

This Coromandel Native Nursery fact sheet is a guide only.

Poa labillardieri "Eskdale"

Description; A long lived, tussock forming, perennial grass with highly ornamental blue foliage.

Grows to; 600mm spread 450mm

Position; Grows well in sunny to shaded positions. Tolerates most soil conditions whilst being frost and drought tolerant.

Ideal for gardens, borders and rockeries.

Care; Water well for the first two to three months until established. Trim older foliage to 150 mm once or twice a year.

Apply slow-release fertilizer in spring and autumn.

Poa Eskdale is popular amongst commercial landscapers for its durability and drought tolerance.
